MESSAGE FROM RECTOR

On behalf of the National University of Management (NUM) and myself, I would like to express my sincere gratitude to all individuals and organizations that have strongly supported and contributed to NUM's high standards in human capital development and internationalization. We are very proud of the success of our talented alumni, current students, and faculty members, who have worked tirelessly to achieve this milestone in quality and excellence. NUM warmly welcomes everyone seeking personal and professional growth within our vibrant real and digital learning campuses. We offer an invaluable gateway to connect with globally renowned university networks.

As we all know, following the COVID-19 pandemic, 2025 marks a year of global economic recovery alongside the emergence of new trends in the job market, particularly in digital transformation. The digital shift has interconnected the real and virtual worlds, and we have adapted by upgrading our curricula, renovating both physical and digital smart classrooms, and enhancing technical labs. These improvements are designed to meet the evolving needs of our students through our network of university partners and industry linkages.

I am pleased to share that NUM has advanced in internationalization through our partnerships with global networks (Erasmus+, GBSN, AUN, AUF, CORE Economic), our inclusion in international university rankings (WURI), and our international student exchange and dual degree programs. Currently, NUM operates two campuses: the historic Wat Phnom main campus, which offers programs in business, management, finance, and accounting, and the new Veal Sbov satellite campus, which focuses on digital economy, science, and technology.

In conclusion, my faculty colleagues and I are committed to meeting our students' expectations by fostering their success in active learning and research. We emphasize personal growth in essential skills such as research, analysis, writing, presentation, and leadership.

I wish you all good health and success!

Dr. HOR Peng, Professor
Rector of NUM

OUR GLOBAL RANKING

The World University Rankings for Innovation (The WURI) assesses higher education institutions' real contributions to industry and society, highlighting innovative education, research, and engagement to society. The ranking aims to spotlight higher education institutions that excel in these innovative approaches, thereby inspiring advancements across the academic and societal landscape. NUM was ranked among top innovative universities in the world.

42 YEARS
1983 - 2025
IN CAMBODIAN HIGHER EDUCATION

National University of Management's story is parallel with Cambodia's socio-economic rehabilitation period in the post Khmer Rouge era. Founded in 1983, NUM was initially an institute that provided educational programs in agriculture, industry, finance, and planning. Over time, this institute evolved both in depth and breadth and has contributed to Cambodia's socio-economic development, particularly in the area of human capital development.

In response to political and economic reform towards democracy and free market, the institute was renamed to Faculty of Business (FOB) in 1994. It launched academic programs in management, marketing, accounting, and finance. Four years later, FOB was renamed to the National Institute of Management (NIM) and the first private tuition programs were introduced in 1998. In 2004, the academic role of NIM was broadly expanded and then became the National University of Management. Soon afterward, NUM was accredited to full status as a public non-profit administration in 2005. Up until 2005, the National University of Management was comprised of seven academic faculties and departments, and a graduate school that offered post-graduate programs including master's degrees and doctoral programs.

In 2011, an International College which was located inside the National University of Management was established. It offers two academic programs which are International Business (iBBA) and Global Entrepreneurship & Innovation. In addition, new international academic programs, international bachelor of law, supply chain management, digital economy, financial technology, and smart city planning management, were introduced in order to respond to the human capital's emerging need for the development of industry 4.0 in Cambodia.

Currently, NUM has total student population of 13,147 and an alumni community of more than 60 thousand. NUM has 9 faculties, 1 graduate school, and 8 academic and professional centers, institute, laboratories. Recently, the university inaugurated a satellite campus that hosts international programs pertaining to industrial 4.0 and envisages to develop new academic programs in response to Cambodia's development need.

Attesting to our commitment and remarkable progress toward academic excellence and innovation, the World University Ranking for Innovation (WURI) ranked us 72nd among the global innovative universities in 2023.

Our university is physically positioned at the heart of Phnom Penh Capital. Our main campus has a long history serving as an infrastructure for education since mid-20th century. Its physical appearance is carefully and innovatively preserved and its purpose remains unchanged – a place to cultivate human capital for Cambodia. At the same time, we are expanding our satellite campus at an emerging commercially living district in Phnom Penh. This satellite campus is dedicated to new international programs and future academic programs development.

Our faculties are diverse and well positioned in an educational environment that aims to nurture future talents of Cambodia. About 20 percent of our faculty members have post-graduate background from both renowned domestic and international graduate schools. They are not only academic professionals, but industrial experts who bring know-how knowledge and best practices to their classes.

In 2023, our university board approved on the five-years strategic plan 2024-2028 that aims to support effective implementation of the university's mission and realization of the university's long-term vision. During the stated period, our priorities will be placed on enhancing quality of education in line with industrial revolution 4.0, promoting research and innovation, developing strategic partnerships, strengthening good governance and human resource management, and developing financial sustainability.

NUM's story has been shared among our community, Cambodian and international talents who we nurtured, and partners who we collaborated with. They are multipliers of positive impact that we deliver to Cambodia and beyond. NUM footprint will be left for many years to come, and her story will continue and be shared and remembered by many.

1983 - 1989

Historically, NUM was originally founded in 1983 as the Economic Institute. The Economic Institute offered a bachelor program in economic fields which specialized in commerce, agriculture, industry, finance, and planning. However, the Economic Institute was renamed to Institute of Economic Science (IES) in 1989. The IES provided academic major fields in economics and commerce.

1994 - 1998

In response to political and economic reform towards democracy and free market, IES was renamed to Faculty of Business (FOB) in 1994. It launched academic programs in management, marketing, accounting, and finance. Four years later, FOB was renamed to the National Institute of Management (NIM) and the first private tuition programs were introduced in 1998.

2004 - 2005

In 2004, the academic role of NIM was broadly expanded and then became the National University of Management. Soon afterward, NUM was accredited to full status as a public non-profit administration in 2005.

Up until 2015, the National University of Management was comprised of seven academic faculties and departments, and a graduate school that offered post-graduate programs including master's degrees and doctoral programs.

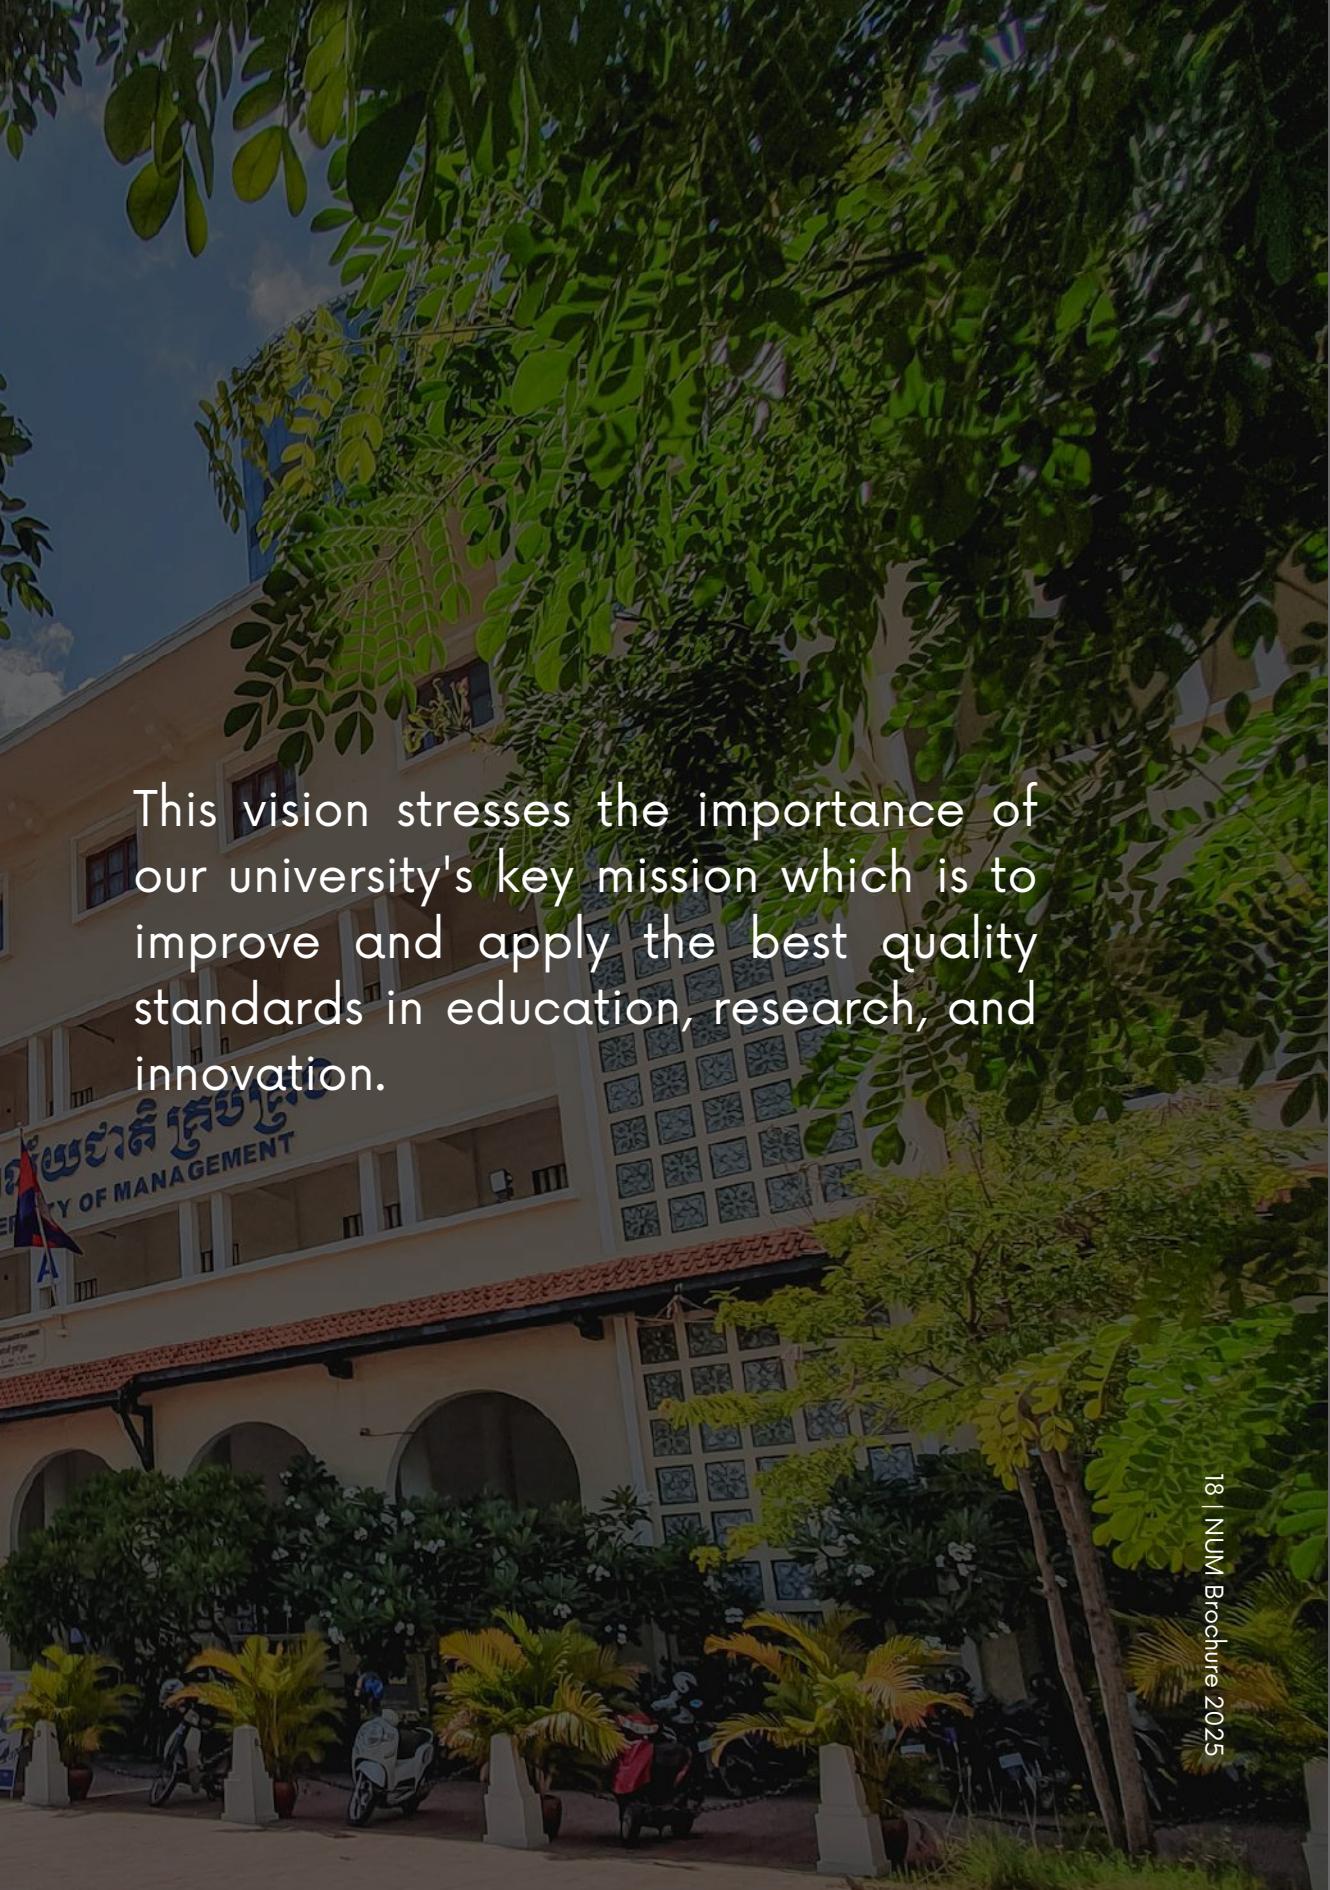

A photograph showing several graduates in black gowns and caps, standing on a grassy field. They are all looking upwards and have their caps in the air, having just thrown them. The background shows some trees and a clear sky.

From 2011

In 2011, an International College which was located inside the National University of Management was established. It offers two academic programs which are International Business (IBBA) and Global Entrepreneurship & Innovation. In addition, new international academic programs, international bachelor of law, supply chain management, digital economy, financial technology, and smart city planning management, were introduced in order to respond to the human capital's emerging need for the development of industry 4.0 in Cambodia.

OUR VISION

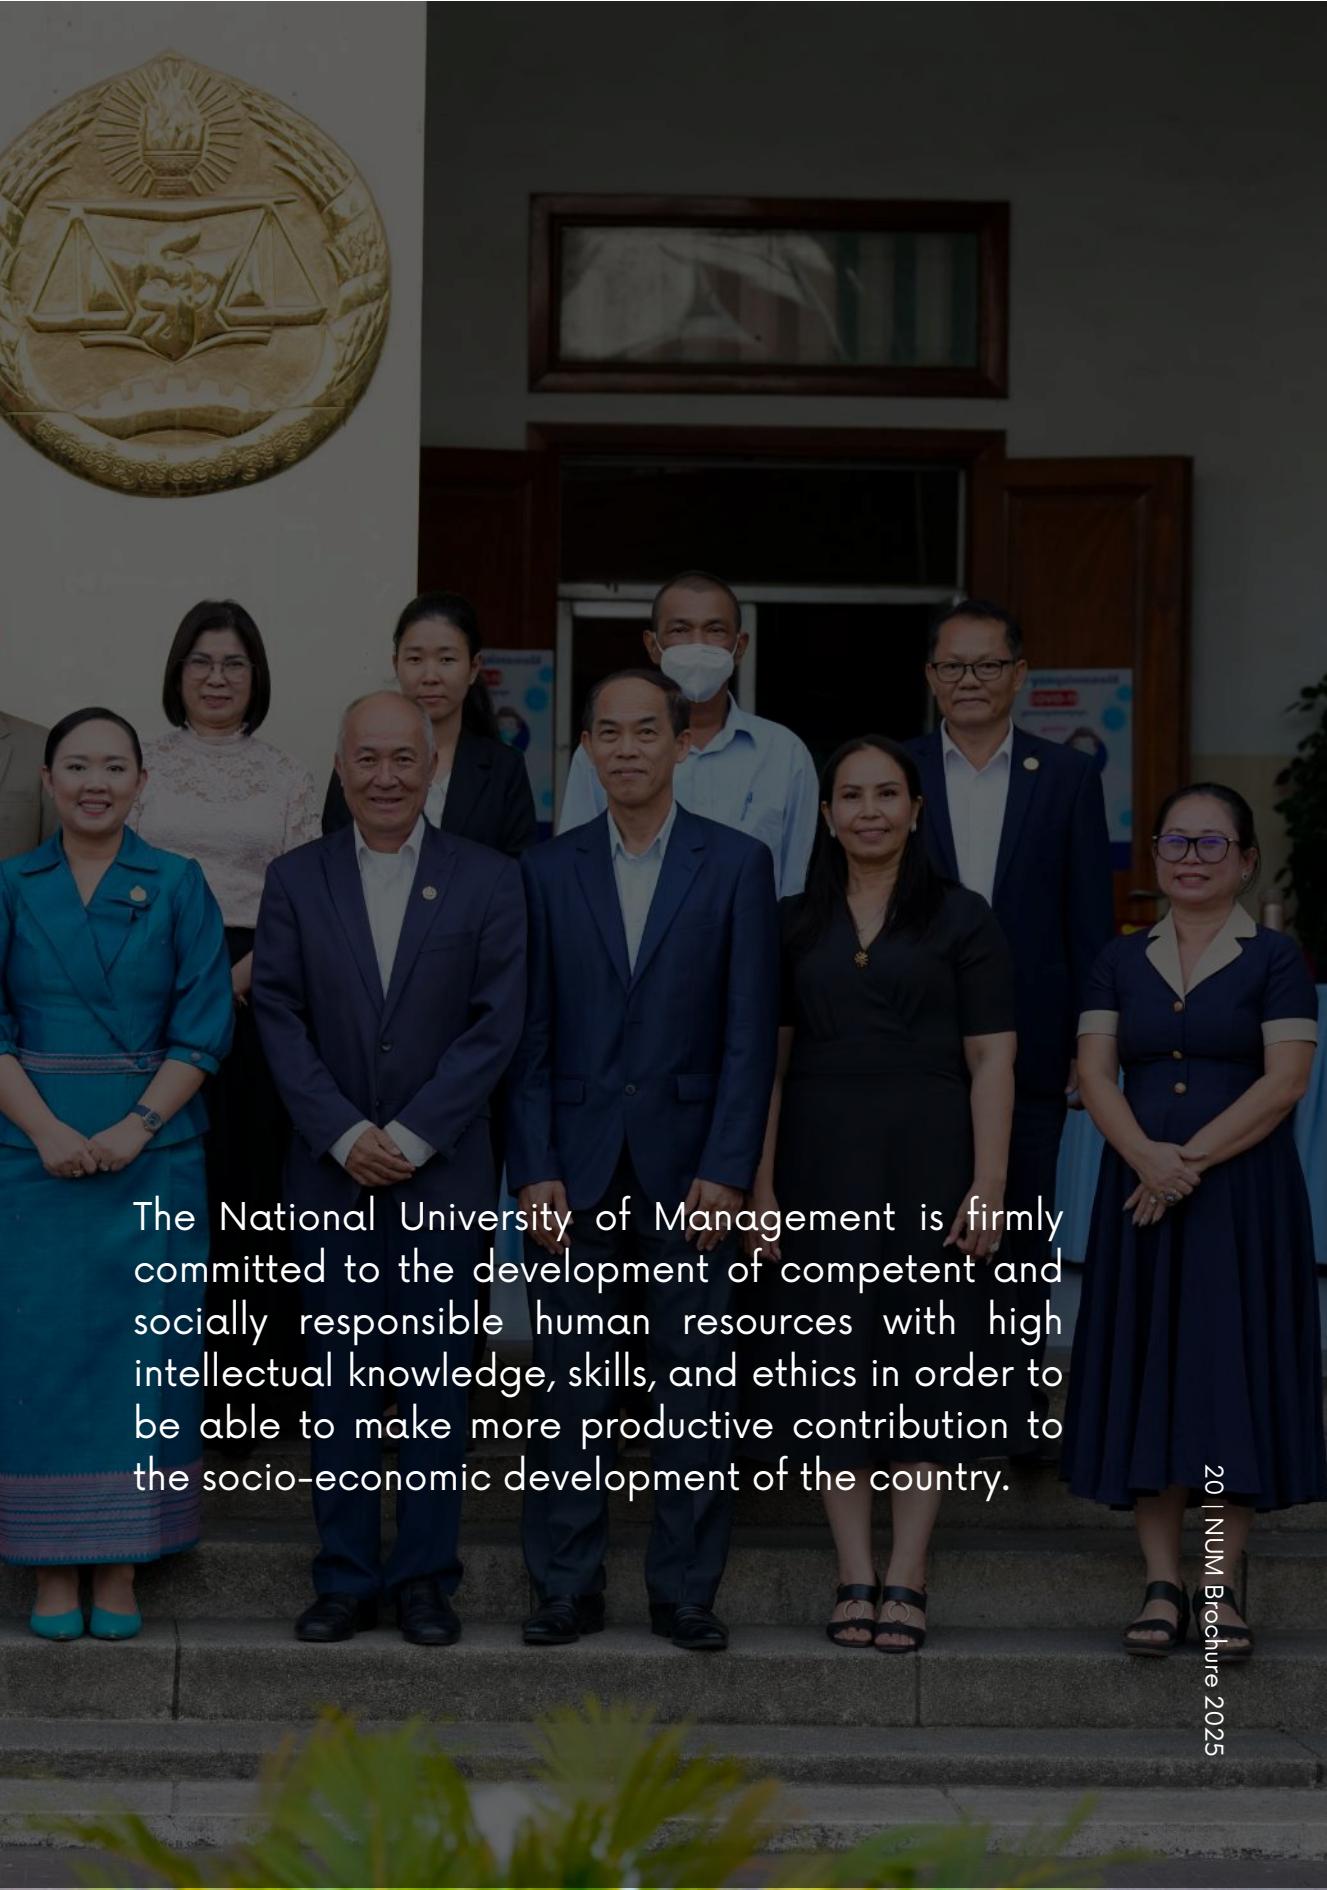

LEADING RESEARCH UNIVERSITY

This vision stresses the importance of our university's key mission which is to improve and apply the best quality standards in education, research, and innovation.

**CULTIVATE
INNOVATIVE
LEADERS,
MANAGERS, AND
ENTREPRENEURS
FOR SOCIETY**

The National University of Management is firmly committed to the development of competent and socially responsible human resources with high intellectual knowledge, skills, and ethics in order to be able to make more productive contribution to the socio-economic development of the country.

Rector Council of Cambodia (R.C.C)

The National University of Management is a founding member of the Rector Council of Cambodia. NUM also held the presidency of the 2nd mandate of the RCC from 2016-2018. The council is responsible for improving the quality of higher education, exchanging work experience, researching and resolving issues of member universities.

Global Business School Network (GBSN)

The National University of Management is a full member of the Global Business School Network. GBSN is a nonprofit organization, founded in 2003 by the World Bank, that partners with business schools, industry, foundations and aid agencies to improve access to quality, locally relevant management education for the developing world. As part of GBSN membership, NUM receives three international assessment standards such as EFMDEQUIS, AACSB, and AMBA.

CORE Economics

NUM is the only university in Cambodia recognised as an associate university in CORE Economics. CORE (Curriculum Open-access Resources in Economics) Econ is an international platform that aims to radically transform economics education that contribute to a more just, sustainable, and democratic world in which future citizens are empowered by a new economics to understand and debate how best to address pressing societal problems.

ASEAN University Network (AUN)

The National University of Management became a member of the ASEAN University Network (AUN-QA Associate Member) since 2021. It is a consortium of leading universities in ASEAN with a mission focused on social and technological progress.

Agence Universitaire de la Francophonie (AUF)

The National University of Management is a member of the Agence Universitaire de la Francophonie - AUF. AUF is the world's leading university network with more than 1,000 universities and scientific research centers from nearly 120 countries. Created in 1961, the AUF is also the operator for higher education and research of the charter and the Summit of Heads of State and Government of the Francophonie.

Sustainable Development Solutions Network (SDSN)

The National University of Management is partnering with SDSN which was established its Secretariat office in Kuala Lumpur, Malaysia, in 2021. The Kuala Lumpur office serves as SDSN's Asia Headquarters, working closely with the New York and Paris offices, as well as regional Networks and partners, to advance SDSN's global mission, with a particular focus on promoting sustainable development in the Asia-Pacific region. Professor Woo Wing Thye, SDSN's Vice President for Asia, heads the new office, which is generously funded by the Jeffrey Cheah Foundation and hosted by Sunway University.

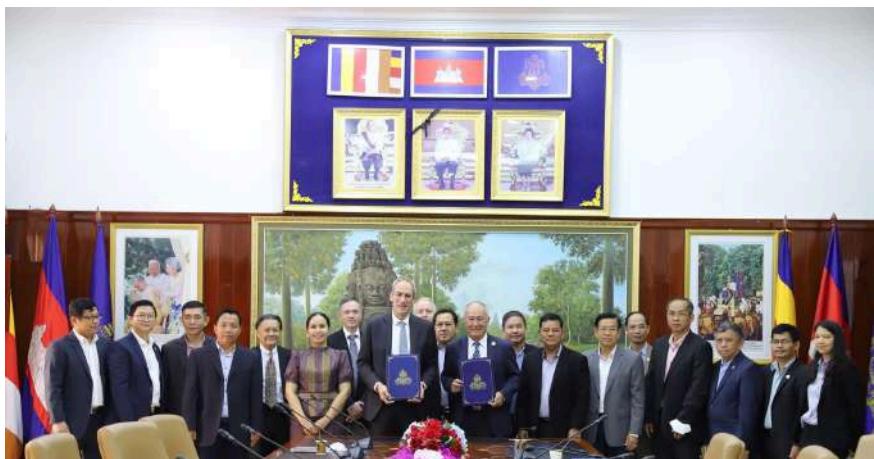

Global Partnership

The National University of Management (NUM) believes that partnerships are essential to realizing our long-term vision to become a leading research university in advancing entrepreneurship and innovation. In that sense, NUM has been working effectively to co-operate with domestic and international higher educational institutions, corporations, and organizations. We always look forward to exchanging knowledge and human resources with public and private entities in order to achieve outstanding results together.

Global Learning

Given our commitment to partnerships, NUM has established strong connections with domestic and international entities to provide opportunities for our students, faculty, and staff. These opportunities include seminars, training, internships, exchange programs, and visiting professors and lecturers. As a result, a large number of our students have gone abroad to participate in seminars and exchange programs at our partner institutions. In addition, partners have always been welcomed to join academic and research activities hosted by NUM here in Cambodia.

OUR HISTORIC CAMPUS

The historic campus of NUM is physically positioned at the heart of Phnom Penh Capital. This campus has a long history serving as an infrastructure for education since mid-20th century. The main building, now also known as Building A, was built between 1955-1960. This urban heritage is carefully conserved and renovated to maintain its architectural aesthetic and functionality. Yet its core purpose remains unchanged – a place to cultivate human capital for Cambodia.

NUM international College or NUM-IC, located at the National University of Management, offers English-based majors which aim to provide students with essential knowledge and skills to prepare them to live and work in dynamic cultures and globalized business environments. We offer five undergraduate programs: International Business, Global Entrepreneurship & Innovation, Supply Chain Management, Finance, and International Law. We also offer a Master's degree program in Global Innovation Management. At NUM International College, students are taught in English by both international and local professors and lecturers who have graduated from abroad with experiential learning and action-oriented instruction.

International Business

To provide students with solid foundation in the field of international business and prepare them to become effective professionals. This English-language program equips students with a deep understanding of the international business landscape. Through theoretical instruction and hands-on practice, we cultivate inquisitive minds and a scientific approach to problem-solving. Our focus is on how domestic and international factors influence business decision-making.

Finance

The program is designed to equip students with the essential skills and knowledge needed for a successful career critical thinking, analysis, research, and finance-related skills to succeed in startups, social enterprises, local companies, global organizations, and both the public and the private sector.

Global Entrepreneurship and Innovation

The Bachelor's degree (BBA) in Global Entrepreneurship & Innovation is an inter disciplinary program that provides the essential skills for success in any business endeavor, be it a startup, social enterprise, international company, or global organization. Students will learn leadership skills and how to build effective teams to deliver value to organizations in terms of launching new products and services, improving organizational systems and processes, and developing new innovative business models. The program will utilize experiential and project-based learning methodologies. Students in the program will develop an entrepreneurial and innovative mindset, which is essential for success in the 21st Century global economy.

Supply Chain Management

The BBA Supply Chain Management program at the National University of Management International College is designed to provide students with in depth knowledge and skills in the field of supply chain management. This program addresses the growing needs of businesses in Cambodia for professionals who can effectively manage the flow of goods, information, and finances in today's complex global supply chains.

International Program for Legal Studies - iLaw

NUM iLaw offers premier legal education, preparing students to be future-ready graduates, practice-ready professionals, and responsible global citizens. With an intimate environment, small classes, and strong faculty support, students can unleash their exceptional potential. Through independent research, student-organized seminars, impactful organizations, international engagement, and practical training, the student experience is unparalleled. As a close-knit community, students, faculty, and staff collaborate to contribute to society through law, inspiring and supporting each other. We pioneer interdisciplinary learning, combining law with technology, innovation, research, and entrepreneurship to transform 21st-century challenges into opportunities.

MBA in Global Innovation Management

The MBA in Global Innovation Management is an accelerated, executive master's program with a duration of 18 months. Courses are taught by experienced professionals and startup entrepreneurs during evening weekday sessions. The business program includes marketing, design thinking, finance, human resource management and leadership - all taught through the lens of innovation. As part of their global experience, all students are required to join a 10 day visit to San Francisco / Silicon Valley where the class will visit leading innovative companies such as Google, YouTube, Airbnb, the design firm IDEO, the management consulting firm McKinsey & Company in addition to attending workshops at the Haas School of Business at UC Berkeley.

MASTER DEGREE PROGRAMS

Master of Business Administration Programs

MBA in Management
MBA in Marketing
MBA in International Business
MBA in Business Law
MBA in Family Business

Master of Science Programs

MSc in Logistics and Supply Chain Management
MSc in Management of Technology
MSc in Bank Management
MSc in Accounting
MSc in Tourism and Hospitality
MSc in Information Technology
MSc in Economics
MSc in Finance
MSc in Environmental Management

Master of Public Administration

Master of Public Administration is designed for students who are interested in public service careers including state or local government, city management, and urban planning, non-profit organizations, and government relations work in private firms. By the end of this program, students will become professionals who are knowledgeable in the theories, principles, and practices of administration and who can apply their skills in a variety of organizational settings, especially within governmental settings.

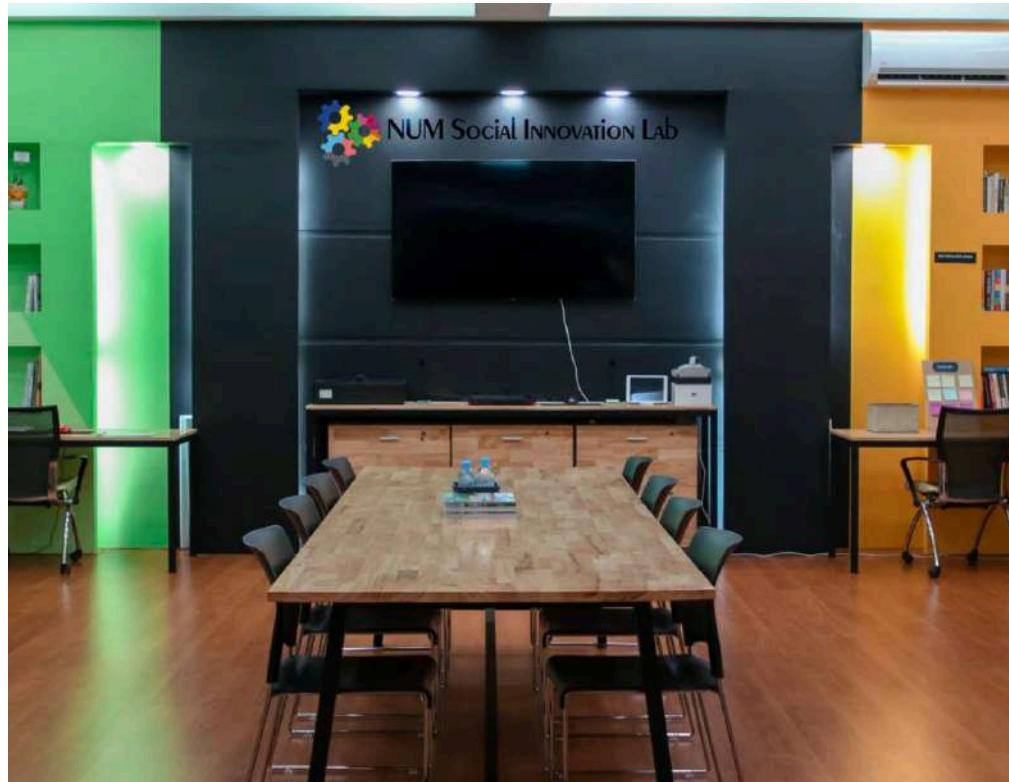

DOCTORAL PROGRAMS

Doctor of Philosophy (Ph.D)

The program is designed to advance human resource development in Cambodia and achieve a high level of academic instruction in a major field that meets regional and global standards. This program enables students to complete an extensive, independent research project under the supervision of an expert academic. When completed this research should make a valuable contribution to the current body of knowledge on a chosen topic. Ph.D. students are required to complete a minimum of 54 credits (21 credits of course works and 33 credits of research works) with a minimum grade of B+. The minimum period for full-time study is six (6) semesters and the maximum is twelve (12) semesters and sixteen (16) semesters for part-time study.

Doctor of Business Administration (DBA)

The DBA Program normally requires three years of intensive study beyond the master's degree. The program focuses on developing competent scholars, heavy emphasis is placed on the development of both teaching and researching skills. The program seeks to educate future management researchers and teachers who generate new knowledge to advance understanding of their major fields and improve management practice by teaching excellence and creating innovative educational strategies. DBA students are required to complete a minimum of 54 credits (27 credits of course work and 27 credits of research work) with a minimum grade of B+. The minimum period for full-time study is six (6) semesters and the maximum is twelve (12) semesters and sixteen (16) semesters for part-time study.

ABOUT THE LAB

The NUM Social Innovation Lab is part of the EU funded South-East Asian Social Innovation Network (SEASIN) with additional support being provided by SMART Axiata. The Social Innovation Lab serves as both a space for seminars and interactive workshops on topics related to social innovation and entrepreneurship and also as an incubator to help develop and launch new social ventures. While the primary target is university students, the NUM Social Innovation Lab is also open to the wider social enterprise community. A maker space is also available within the Social Innovation Lab so that students and outside community members can work to develop physical prototypes via the use of 3D printers. The NUM Social Innovation Lab also serves as the main training venue for the National Business Model Competition (BMC) which is an annual entrepreneurship competition open to all university students in Cambodia. The National Business Model Competition is also affiliated with the regional Mekong Challenge, which was launched in 2006 in partnership with the international consulting firm McKinsey & Company, and also with the Business Model Competition Global in the United States.

Physical Space

The Social Innovation Lab at NUM consists of two large rooms which connect internally via a large sliding door.

Event Space

The first room is devoted to workshops, seminars, and training. The furniture is mobile which will enable different design configurations to meet the requirements of different presentation formats.

Incubation Space

The equipment in this space (e.g. the maker space) is accessible to the public. A small resource library is placed in the Incubation space which includes books and other printed material relating to social entrepreneurship and innovation.

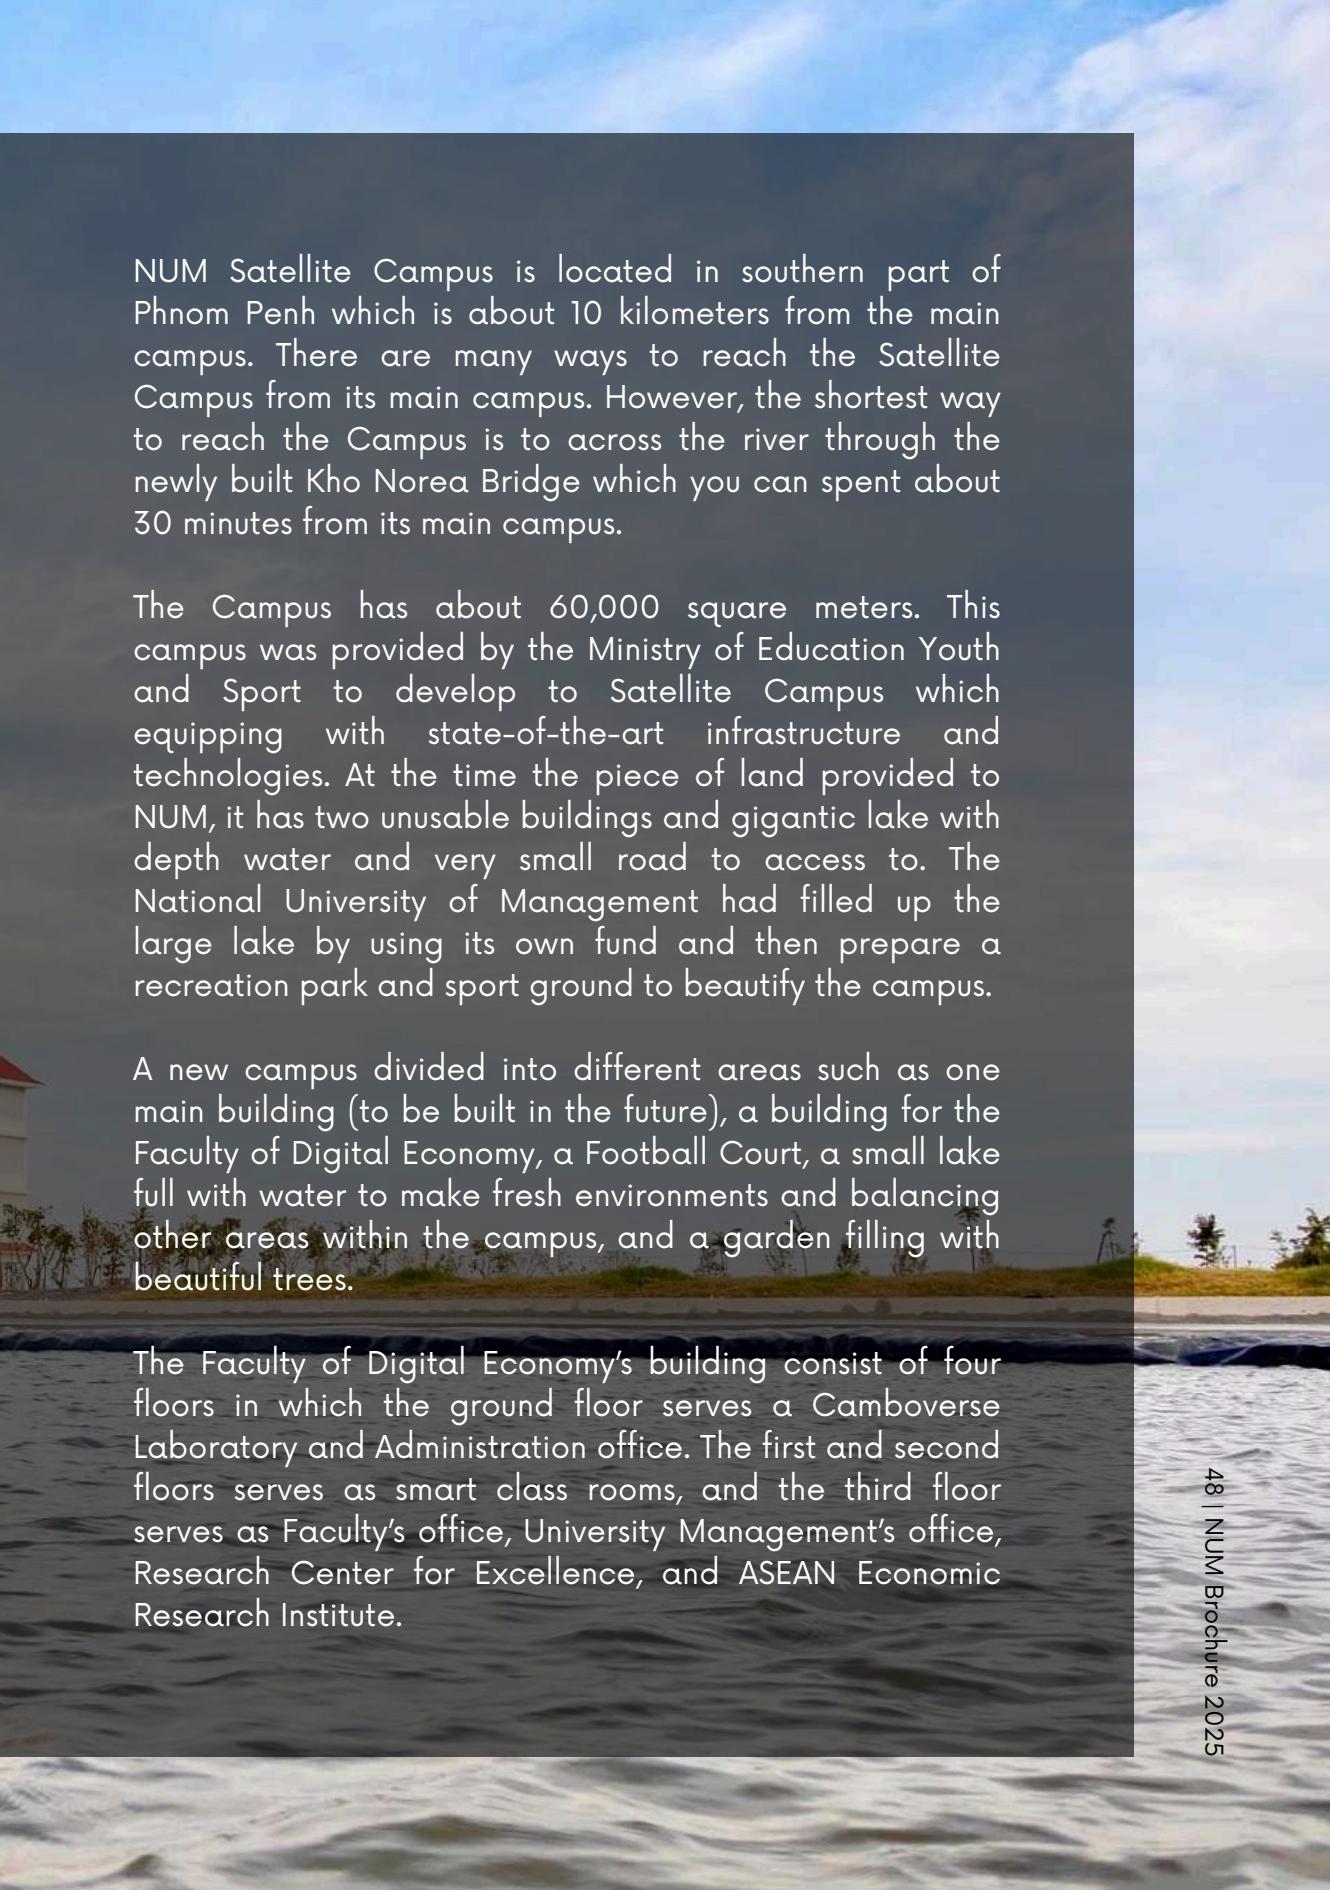

ABOUT THE CAREER CENTER

With the support of USAID Cambodia, the University of California Berkley (UCB) in collaboration with The Asia Foundation and the National University of Management has launched the "Digital Career Development" project. This five-year project aims to enhance digital employment skills by strengthening the capacity of higher education institutions in Cambodia to receive international standard assessments, increase the number of scholarships, internships and relationship building opportunities to support the implementation of skills and employment opportunities for Cambodian youth. NUM as a partner of the project, commenced the career center supported by USAID.

VEAL SBOV SATELLITE CAMPUS

NUM Satellite Campus is located in southern part of Phnom Penh which is about 10 kilometers from the main campus. There are many ways to reach the Satellite Campus from its main campus. However, the shortest way to reach the Campus is to cross the river through the newly built Kho Norea Bridge which you can spend about 30 minutes from its main campus.

The Campus has about 60,000 square meters. This campus was provided by the Ministry of Education Youth and Sport to develop to Satellite Campus which equipping with state-of-the-art infrastructure and technologies. At the time the piece of land provided to NUM, it has two unusable buildings and gigantic lake with depth water and very small road to access to. The National University of Management had filled up the large lake by using its own fund and then prepare a recreation park and sport ground to beautify the campus.

A new campus divided into different areas such as one main building (to be built in the future), a building for the Faculty of Digital Economy, a Football Court, a small lake full with water to make fresh environments and balancing other areas within the campus, and a garden filling with beautiful trees.

The Faculty of Digital Economy's building consist of four floors in which the ground floor serves a Camboverse Laboratory and Administration office. The first and second floors serve as smart class rooms, and the third floor serves as Faculty's office, University Management's office, Research Center for Excellence, and ASEAN Economic Research Institute.

OUR VISION

TO BE A LEADING UNIVERSITY
IN EDUCATION, RESEARCH,
INNOVATION AND
ENTREPRENEURSHIP

OUR MISSION

TO CULTIVATE INNOVATIVE
LEADERS, MANAGERS, AND
ENTREPRENEURS FOR SOCIETY

CORE VALUES

- QUALITY
- RESEARCH
- INNOVATION
- COMMUNITY
- GREEN

The introduction Faculty of Digital Economy, which was initiated by H.E. Dr. Hang Chuon Naron, Minister of the Ministry of Education Youth and Sport, is at the right time as the Royal Government of Cambodia sets out a long-term vision, through "Cambodia Digital Economy and Society Policy Framework 2021-2035", to build a vibrant digital economy and society by laying the foundations for promoting digital adoption and transformation in all sectors of society – the state, citizens, and businesses – to promote new economic growth and improve social welfare in the "new normal".

The COVID-19 outbreak, which hit every corner of the world since late 2020, has boosted the demand for digital technology to overcome issues that the pandemic has brought along. This has a profound impact and implication on the labor market and makes digital economy skills even more crucial for younger generation who will become the human capital for Cambodia and for anywhere else in the region and the world.

Taught by both experienced national and international professors and world-class experts from NUM's university partner network from around the world, the faculty offers three international English-based programs – Digital Economy, Financial Technology and Smart City Planning Management. The three programs will not only support the Royal Government of Cambodia to achieve the "digital transformation" to turn Cambodia economy and society to a higher level of development, but also responds to the human capital's emerging need for the development of industry 4.0 in Cambodia and align with the regional and global trends.

Graduates of the Digital Economy Programs are to be equipped with both digital knowledge and digital technology and innovative ideas to solve real-world socio-economic problems.

Digital Economy

The bachelor's degree program in digital economy aims to produce qualified graduates to guide businesses and consumers to understand the potential benefits of the digital economy. More specifically, it aims to provide a critical overview of digital economic practices and models, with a specific focus on key concepts and theories required to understand the changes brought about by digitalization in the cultural industries and in the audiences. Organizations in development need economists holding digital competence. Successful graduates from this program can find work in a huge variety of areas, from government units to business companies and industries. Some of these job opportunities include economist, data scientist, business analyst, IT consultant and project coordinator etc.

Financial Technology

This program is designed to nurture financial technologists and entrepreneurs with essential knowledge in both finance and technology so that they can take leading roles in innovation and applications of financial technology. This program prepares students with knowledge that allows them to have a broad career pathway as they could take up positions in the Fintech industry, finance, and IT industries. The entry-level position for graduates includes, but not limited to financial analyst, investment banking analyst, product manager, data analyst, and data analyst.

Smart City Planning Management

This program is designed to develop skills that align with global and national initiatives towards smart cities. Graduates are expected to have the ability to innovate solutions to urbanization challenges through application of interdisciplinary knowledge across technology, social sciences and public management. The program will prepare students for a wide variety of job roles including IT or management consultants for smart systems, sustainable solutions designer, urban planner, as well as smart systems designer and developer.

Public Policy is an interdisciplinary field that integrates politics, law, administration, economics, and more. The School of Public Policy at the National University of Management was established pursuant to an insightful initiative and long-term vision of His Excellency Dr. Hang Choun Naron, Deputy Prime Minister and Minister of Ministry of Education, Youth and Sport in promoting the education of public policy and administration in the Kingdom of Cambodia.

Students gain a deep understanding of social and economic challenges while developing practical skills through research and hands-on projects. Graduates from NUM School of Public Policy are well-equipped for diverse career paths, including roles in the public sector, private enterprises, non-profit organizations, international agencies, and academia.

Aligning with national and international norms and practices, the School of Public Policy has a vision to position the National University of Management as an internationally recognized university which creates groups of leaders, policy-makers and decision-makers who have innovative vision with comprehensive knowledge of theoretical frameworks and skills in applying practical solutions.

Bachelor's Degree in Public Policy

The Bachelor's Degree in Public Policy of the School of Public Policy at the National University of Management (NUM) is designed for students who wish to develop their knowledge and skills in political science, laws, economics, sociology and other social science in the context of globalization and digitalization. Moreover, the program is designed to equip students with practical skill in public policy analysis, communication and research so that students can further their education at graduate level or pursue a career in public, private or non-profit organizations.

Master of Science in Digital Economy

The Master of Science in Digital Economy program is designed for students who wish to further develop/upgrade their knowledge and skills in the fields of digital economy, smart city planning management and financial technology.

Master's Program in Public Policy

Master's Program in Public Policy (MPP) is designed for students who wish to develop their knowledge and skills in preparing, implementing, analyzing and evaluating the effectiveness of public policy of the government, administration at national level and sub-national administration level, etc. Public policy is used to address the challenges of any sector of society and the economy or to achieve specific goals of national institutions at all levels and fields. Based on public policy, enterprises, private companies, national and international organizations, non-governmental organizations can develop their own governance policies to comply with public policy.

Master of Laws in Comparative Law

The Master of Laws in Comparative Law (LL.M in Comparative Law) at the National University of Management (NUM) is designed for students who wish to develop their knowledge and skills in the field of law through comparative method of learning and research of the national and foreign justice system in context of globalization. By the end of this program, the students will be able to identify the weaknesses/problems of the law and the legal system in Cambodia and propose the resolutions for the said weaknesses/problems through comparative law approach.

Doctoral Program in Public Policy

Doctoral program in public policy is designed to provide professionals, researchers and students with advanced knowledge and expertise of public policy in any field of research interest. The applicants who wish to enroll in doctoral program in Public Policy must present great interest in conducting independent research under the guidance of academic supervisor, in teaching two courses relevant to their field of research at NUM and assisting academic supervisors in research and teaching activities.

ABOUT THE CENTER

The National University of Management's Center of Excellence for R&D and Innovation (CERI), formerly known as NUM-Research Center, has been established since 2013. It was a result of the university's effort to create a network between academia and the business community, as well as to promote research activities among faculty members and other researchers worldwide. Motivated by the strong commitment of NUM management and staff, several development partners, including the World Bank, the Asian Development Bank, and the United Nations Development Programme in Cambodia, have provided support for the implementation of various project activities under the center. The NUM Research Center was established with the primary objectives of promoting the scientific research process and the publishing activities of all faculty academicians and researchers. One of the key goals of the NUM Research Center is to enhance interdisciplinary research at NUM. Over time, the research center has evolved into a CERI. To achieve the objectives mentioned above, the following strategic actions have been implemented.

ACADEMIC AND POLICY RESEARCH

CERI carries out an integral task to our university long term vision to promote academic research through our NUM Research Series, providing support to students conducting research theses, and coordinating textbook writing and publication projects. These scholarly publications contribute to promoting research and publication culture, innovation, and enrichment of knowledge resources. We engage our research and dissemination activities with researchers and students from beyond the country. We also actively conduct policy research in collaboration with the government, development partners, and other international organizations. Our policy research provides policy alternatives for the government and relevant stakeholders.

The 8th International Thematic Symposium
Co-organized by NUM and Kanazawa University

Research Exchange between students from NUM and
Kobe University, Japan

Field visit for a policy research project in
collaboration with the MLMUPC

ABOUT THE INSTITUTE

The National University of Management is honored to be selected by the Ministry of Education, Youth, and Sports to establish an institute to support academic research with a focus on economic issues and policy development in line with a particular focus on the establishment of the Asian Economic Community (AEC). The establishment of the ASEAN Economic Research Institute confirms NUM's commitment to enhance and encourage research among faculties in the area of economic strategy and policy. The initial impetus for this project comes from Cambodia taking the Chair of ASEAN in 2022 and it is expected that research will be initially driven by the theme and direction of Cambodia's chairmanship in continuing the development of AEC in line with the ASEAN Charter. Once established research will continue to explore the ongoing development to AEC Blueprint 2025 and beyond.

AIMS AND OBJECTIVES OF THE INSTITUTE

- Study economic development strategies of ASEAN member countries and provide inputs for Cambodian policy makers to enhance the competitiveness of the Cambodian economy.
- Liaise with policy makers, the business community, and NGOs to identify priorities and areas of support as the development of AEC continues.
- Encourage close and beneficial cooperation with other educational and regional organizations within the ASEAN community.

ABOUT THE CENTER

The CamboVerse Center focuses on exploring and developing virtual and augmented reality experiences with a particular emphasis on Cambodian cultural and historical contexts. Such a center promotes the preservation and innovative dissemination of cultural heritage through modern technology, making it accessible to a global audience and future generations. By merging technology with cultural education, the CamboVerse Center hopes to foster a deeper global appreciation and understanding of Cambodian culture, history, and contributions.

Research Activities

NUM has a strong commitment to promoting research in every discipline. Our faculty members are actively engaged in research projects that address some of the most pressing issues of our time. Students are also encouraged to participate in research projects under the guidance of experienced mentors, giving them access to a valuable hands-on learning experience. Our university offers state-of-the-art research facilities, including libraries, laboratories, and equipment, to help our researchers and students conduct their work to the highest standards. We also have established partnerships with external research groups, allowing us to stay in step with the latest advances and develop joint research programs that bring real-world impact. Through a dedication to research, we empower our students and faculty to innovate, create, and drive progress in their respective fields. Our commitment to promoting research makes us a leading institution in the pursuit of knowledge and discovery.

Student Mobility

With partnerships in over 40 institutions abroad, our students have the opportunity to immerse themselves in diverse cultures and gain invaluable experience that will enhance their academic and professional careers through exchange programs and international internships. We encourage students to take part in exchange programs, where they can spend a semester or year studying at a partner university overseas. At NUM, students have endless opportunities to broaden their horizons and expand their skill set through international experiences.

Cultural Exchange

The university promotes culture and tradition to our diverse student body. From hosting cultural festivals and events, we aim to foster a sense of appreciation and respect for our national identity and tradition.

Ethical Value and Social Responsibility

Our students are equipped with both moral value and a sense of high responsibility. We believe that their actions as students in the present time shall determine their conduct in the future as professionals, corporate managers, enterprise leaders, and change-makers. The contribution that they make will generate a positive impact to society and respective communities of their profession.

Students should have ethical values and social responsibility because it helps them become better citizens and contribute positively to society. Ethical values teach students how to make good decisions based on principles that guide their behavior. It helps them to act with integrity and honesty, and to be transparent in their dealings. Social responsibility helps students understand their role in building a better community and protecting the environment. It encourages them to take active roles in volunteering, supporting charities and engaging in sustainable practices. By practicing ethical values and social responsibility, students will develop strong character and leadership skills that will serve them well throughout their lives.
